

3 Courses

Arranging and Visualizing  
Data in R

Linear Regression Modeling  
for Health Data

Logistic Regression and  
Prediction for Health Data

May 21, 2024

**Emmanuel Oluwatobiloba Oderinde**

has successfully completed the online, non-credit Specialization

# Data Science for Health Research

In this three-course specialization, learners were taught to read in, summarize, and analyze data to learn how to make data-informed decisions, particularly in the areas of global public health. Learners developed an understanding of both the practical elements of data wrangling as well as the statistical underpinnings of common models used for the analysis of health data.

Philip S. Boonstra  
Associate Professor,  
Biostatistics  
School of Public Health  
University of Michigan

Bhramar Mukherjee  
John D Kalbfleisch  
Distinguished Professor  
Professor of  
Epidemiology  
Professor of Global  
Public Health  
School of Public Health,  
University of Michigan

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
